

How to Make Sure You Receive CMCOAG E-Mail's

Increasingly, ISPs are using filtering systems to try and keep Spam out of customers' inboxes. But all too often, they also filter the e-mail that you want to receive.

To make sure that CMCOAG Newsletters, e-mail and support e-mails are not filtered into your "junk" or "bulk" folder, please add CMCOAG.com to your list of trusted senders. Here's how:

Hotmail: Place the domain CMCOAG.com in your safe list. The safe list can be accessed via the "Options" link next to the main menu tabs.

AOL: Place the domain CMCOAG.com in your address book.

Yahoo! Mail: If one of our e-mails is filtered to your 'bulk' folder, open the message and click on the "this is not Spam" link next to the "From" field.

Other providers: If our CMCOAG Newsletter and e-mails are being filtered, try adding our domain from our newsletter's 'From' or 'Reply-to' address to your address book or contact list. If this option is not available, try moving the message to your 'inbox' or forwarding the message to yourself.

If subsequent messages continue to be filtered, call or e-mail your ISP's tech support and specifically ask how you can be sure to receive all e-mail from CMCOAG. Follow their instructions for whitelisting CMCOAG e-mails.

It's a shame to bother you like this, but in this day and age, we feel like the dolphin caught in the tuna-spam net. We support fully the anti-spam measures of all mail servers and ISPs. But please do make sure that your mail server or ISP is not accidentally keeping CMCOAG Newsletter information from you.

Sorry for the inconvenience, but these circumstances are beyond our control. All we can do is work together with the ISPs to shut out the spammers.

Kind regards
CMCOAG
