ODOUR PROBLEMS!

COMMUNITY ACTION GROUP FORMED

The Canning Melville Community Odour Action Group (CMCOAG) has been formed to lobby for the elimination of all odours being emitted from South Metropolitan Regional Council Composting Facility in Bannister Road Canningvale.

Information to date suggests people living 2.9 kilometres away from the plant have been exposed to the foul odours.

Community input is being sought to identify how many people are being affected, how often and over what distance.

To do that a map is being prepared to plot the extent of the area being affected.

Please phone 0410 463 737 or email info@cmcoag.com if you have been experiencing any odour problems.

- Please supply your Street and Suburb, to enable us to chart this problem.

If you would like to keep up-to-date on the Canning Melville Community Odour Action Group's progress please visit <http://www.cmcoag.com/>

There is also a need for individual households to keep a record of how often they experience the problem. Please keep track by completing the details on the rear of this flyer.

The SMRC has spent millions to conduct remedial works yet the odour continues to be emitted by the RRRC's Waste Composting Facility.

This odour problem is not going away by itself it needs a large vocal community to be heard for the appropriate action to be taken.

Encourage your neighbours and friends affected by this problem to get involved.
