How to Make Sure You Receive CMCOAG Newsletter Updates and Emails

Increasingly, ISPs are using filtering systems to try and keep Spam out of customers' inboxes. But all too often, they also

filter the e-mail that you want to receive.

To make sure that CMCOAG newsletters, updates and e-mails are not filtered into your "junk" or "bulk" folder, please add

CMCOAG to your list of trusted senders. Here's how:

Hotmail: Place the domain CMCOAG in your safe list. The safe list can be accessed via the "Options" link next to the main

menu tabs.

AOL: Place the domain CMCOAG in your address book.

Yahoo! Mail: If one of our e-zines is filtered to your 'bulk' folder, open the message and click on the "this is not Spam"

link next to the "From" field.

Other providers: If our CMCOAG newsletter is being filtered, try adding our domain from our newsletter's 'From' or 'Reply-to'

address to your address book or contact list. If this option is not available, try moving the message to your 'inbox' or

forwarding the message to yourself.

If subsequent messages continue to be filtered, call or e-mail your ISP's tech support and specifically ask how you can be

sure to receive all e-mail from CMCOAG. Follow their instructions for whitelisting CMCOAG. Let them know you want to receive

all emails coming from "cmcoag.com".

Sorry for the inconvenience, but these circumstances are beyond our control. All we can do is work together with the ISPs to

shut out the spammers.

Thank you for your time...

Kind regards

CMCOAG - Canning Melville Community Odour Action Group
